

AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

Please amend page 1, the paragraph beginning at line 10 to read as follows:

This type of air purifying device ~~devices~~, known per se are known from many Finnish and U.S. patents. Air passing through the air-purifying device is subjected to an ion blast, whereby particles in the air will be forced against and attached to the collecting surface. The collecting surfaces are purified at intervals by means of water jets or a mechanical vibrator device. Practice and experiments have shown that this kind of devices will purify even particles of nano size.
